Pre-installation Data Sheet   Shower Trays

Index

Notes

PLANNING
Before starting the installation, plan the layout in detail, taking the site conditions into consideration.

NORMAL USE
The Stonetto shower tray is designed for installation directly on the floor with a support or support frame. Any other usage is deemed as not corresponding with normal usage. Duravit AG assumes no liability for abnormal usage.

TARGET READERSHIP AND QUALIFICATIONS
The shower tray must only be installed by trained plumbing engineers.

Pre-installation

INSTALLATION LOCATION / INSTALLATION ROOM

> Make sure that the installation location fulfils the following criteria:

Doors / external access	• Ensure that doors or other access openings are large enough to accommodate transport dimensions, keeping in mind the weight and need for sufficient manoeuvring room.
Required area	• Allow for enough space around the tub for the installation.
Floor	• Completely level • At a right angle to the wall • Note the overall strength of the floor structure including the floor finish • No underfloor heating should be located under the shower tray.
Wall	• Tiled wall • At a right angle to the shower tray / floor • Completely straight • Note the overall strength of the wall structure including the wall finish.

WATER INSTALLATION

All work associated with the water connection may only be undertaken by a qualified plumber. The installation must be in accordance with country-specific standards and local regulations.

Water connection

• Connections for the water supply and drains must be in compliance with the currently valid standards and public regulations.

• Position the water drain (DN 50) flush to the mounting surface or out of the wall directly above the mounting surface; see drawing for recommended area.
SEALING LAYER

NOTE	**Product and / or material damage due to no seal.**

> A compound seal is absolutely essential behind and below the shower tray. The planner must include this across all trades.

> The sealing set # 792803 is only to be used to create a second sealing level.
The installation must be in accordance with country-specific standards and local regulations. Please observe the current version of the data sheets issued by the Central Association of the German Construction Industry (ZDB data sheets).
RANGE OF APPLICATIONS

### Flush with the floor

### Semi-recessed

Mounted on tiles

NON-SLIP PROPERTY

Duravit shower trays made of DuraSolid Nature achieve evaluation category C for wet barefoot areas without any further coating because of their material properties (DIN 51097).
